

Blackburn Starling Secures BT Framework Agreement

Blackburn Starling a Nottingham based international electrical engineering company, were delighted with the recent Framework Agreement awarded to them by BT. The decision came after a successful working relationship between Blackburn Starling and BT throughout the last twenty years during the completion of many projects throughout the UK.

Blackburn Starling has a trading history that dates back to 1870, and throughout their 130-year history they have been involved in many facets of electricity. The company's positive, non-adversarial approach has made them a perfect choice for the telecommunications giant, and the recently awarded BT Framework Agreement is for the supply of AC power equipment into the power generation industry for the control of standby generators, including SCADA and remote interrogation software.

Blackburn Starling also offers comprehensive Motor Control System Solutions to major companies across a wide range of industry sectors and has a wealth of experience in the water, power generation, food, brewing, chemical, pharmaceutical and oil and gas industries, both in the UK and overseas.

The BT Framework Agreement has come at an opportune time for Blackburn Starling who continue to expand into new industry sectors and increase their

worldwide export activities. As communication is vital to success and with information technology expanding at a rapid rate, worldwide communications become faster, easier and more efficient. As a user and provider of new technology, Blackburn Starling provides engineering solutions and integrated intelligent systems throughout the UK and worldwide.

A full range of products and services is available from the initial design concept to post-delivery support - all from the Nottingham manufacturing facility and headquarters. The company also has Middle East operations supporting export activities with offices in Abu Dhabi and a further manufacturing facility and offices in Dubai.
