of all major international suppliers.

Industry Sectors:

Water
Oil & Gas
Food & Beverage
Brewing
Chemical & Pharmaceutical
Telecommunications
Transportation
Power Generation

Capabilities:

MIS/MES
SCADA & PLC
MV & LV Motor Control Centres
MV & LV Switchboards
Design & Manufacture
Installation & Commissioning
Service & Support

Blackburn Starling has over 130 years' experience as an independent company in the field of electrical control. During this time the company has gained a high degree of experience and a reputation for service, flexibility and reliability that has produced a wide and varied loyal customer base across a diverse range of industry sectors. This base is particularly strong in the water industry and continues to grow with repeat business being a major factor.

Working with our customers in an open environment we design, build, install, commission and service/support all the elements of an integrated control system. Our systems range from software only projects to total control and automation, project managed turnkey solutions.

From our factory (over 5,000 square metre's) in Nottingham, we have provided integrated control solutions to all corners of the world. The skilled workforce of over 200 employees works in integrated teams providing continuity to regular customers and industries. Over 50 design engineers with 100's of combined years experience, use the most suitable proprietary equipment from the worlds leading suppliers, housed in Blackburn Starlings own in-house designed and manufactured enclosures. These solutions can combine software for PLC and SCADA with MCC, distribution, instrumentation and control, all housed in our own bespoke panels, in any combination or configuration that best provides the most cost effective solution to the control and physical requirements of any project.

Where appropriate we partner with the worlds leading suppliers to bring the very best experience and products to providing the solution best suited to our customers needs. To this end we are partners with Siemens, Rockwell, Pantek (Wonderware) and Mitsubishi for provision of their Automation products and software plus we have experience of all major international suppliers. We also have in-depth experience of many other product providers and have implemented many projects either integrating or replacing differing systems/products/software. Using structured design techniques and our own in house developed application software we can quickly provide standard building blocks for each application that can be used over and over again providing: consistency, repeatability and ease of use and maintenance.

Blackburn Starling takes pride in delivering on time the best most cost effective solution to all of our control and automation customer requirements.
